EDUCATION

Software Engineering Immersive

General Assembly

March 2023 - June 2023

Adv. Diploma - Games Programming

Academy of Interactive Entertainment

January 2017 - November 2017

PROFILE

Versatile and driven software engineer, recently graduating from General Assembly's Immersive bootcamp, and with a solid background in operations and warehouse logistics.

PROJECTS

BeatBox

Group Project

Music player using Spotify's services and authentication.

- Co-managed a small team in developing a music player using Vite and React.
- Managed user authentication through Spotify OAuth.
- Display of user playlists and profile using access tokens.
- Retrieval of current trending playlists for display on the home page.
- Song playback using the Spotify Web Playback SDK.

Gamecade

Group Project

Drawing game app with matchmaking and chat system.

- Collaborative duo project developing a drawing game app in Vite and React.
- Managed user access through Firebase Authentication.
- Utilized Firebase's Firestore to handle lobby creation and removal.
- Implemented a global chat system for users to communicate and share lobbies using Firestore.
- Leveraged Firebase Storage for image upload and download.

WORK EXPERIENCE

Production Worker

Iplex Pipelines

March 2022 – March 2023

- Manufactured water, sewer and electrical PVC pipe to Australian standards.
- Maintained less than 5% reject rate on manufactured pipe across assigned jobs.
- Maintained production, change-over and repair duties of machinery.
- Adjusted production to account for changing deadlines of clients, providing for a lot of Sydney's major infrastructure.

Warehouse Storeperson

Volkswagen Autonexus

December 2019 - April 2021

- Order picking automotive engine and body parts to be shipped out to dealerships and repair shops.
- Storage of received automotive engine and body parts
- Packing of items for dispatch. Involved packing the item with sufficient padding and protection for the receiver.
- Maintained a safe working environment through the attendance and application of 'tool-talk' meetings, and reporting/tagging faulty equipment and machinery.
